

This is the screen you'll see when you open the app.
Click get started.

There are two ways to log in to your account.

You can either use your phone number, receiving a security code, or you can log in with your email and password.

To log in with your phone number, enter your phone number then click next.

Once you do that, you will receive a security code. Enter the security code into the app and hit next.

It is recommended that you allow the My GoBus app to use your location as this will make it easier for the system to find your location when booking a trip.

You will also be asked if you want the app to send you notifications. Whether to allow notifications or not is up to you. This does not affect anything as GoBus sends you notifications via call and text, not through the app.

You can also log in with your email and password that we sent you when the new system launched,

Simply type in your email and your password then click next.
