

General Manager's Report - Regular

July 20th, 2023

1. Accessibility Plan

A meeting of the Metrobus Accessibility Advisory Committee will be scheduled in the next few weeks to review the Committee's Work Plan. As the Metrobus plan will become part of the overall City Accessibility Plan, once the Committee completes its work, staff will collaborate with City staff on final format and overlapping areas that affect transit services.

2. GoBus

Delivery of the eighteenth and final bus ordered is expected by the end of August. The delay was due to a bus being written off during delivery as a result of an accident while in transit.

Update: *Delivery is expected to be early October.*

3. BlindSquare

A meeting will be held with CNIB on August 10th to launch the project.

4. New Design for Route Schedules

In response to questions regarding the new design, focus groups were not held, however, previous customer feedback on schedules was taken into consideration and incorporated in the new design. Also, any feedback received over the summer will be considered before the printing of the Fall schedules.
